Hello,

The following submission has been created.

Track Name: Artificial Intelligence, Computer Networks, and Security

Paper ID: 29

Paper Title: Image Processing: Review on the uses of this technology in the field of agriculture

Abstract:
Agriculture could be completely changed by image processing, a rapidly evolving technology. An overview of the current state of the art in this study. The study emphasizes the use of image processing in agriculture and offers a summary of the state-of-the-art benefits and drawbacks of these strategies, as well as the difficulties in applying them, are covered in the paper. The paper also discusses applying image processing methods for yield estimation, quality evaluation, and plant disease identification processing for agriculture using remote sensing technologies. The paper ends with suggestions for more studies on image processing methods in agriculture. Overall, this analysis offers insightful information about the level of potential to raise the sector's productivity and sustainability.
